

REMEDIAL SITE ASSESSMENT DECISION - EPA REGION IV

Site Name: NAVETELL

EPA ID#: FLD118624188

Alias Site Names: _____

City: FT. LAUDERDALE

County or Parish: Broward

State: Florida

Refer to Report Dated: 7/26/94

Report type: SIP

Report developed by: BVWST

DECISION:

☒ 1. Further Remedial Site Assessment under CERCLA (Superfund) is not required because:

<input checked="" type="checkbox"/> 1a. Site does not qualify for further remedial site assessment under CERCLA (No Further Remedial Action Planned-NFRAP)	1b. Site may qualify for further action, but is deferred to:	RCRA	NRC
---	--	------	-----

☐ 2. Further Assessment Needed Under CERCLA: 2a. (optional) Priority: ☐ Higher ☐ Lower

2b. Activity	PA	ESI
Type:	SI	HRS evaluation

| | Other: _____

DISCUSSION/RATIONALE: The facility sold and repaired data communications test equipment. Cleaning solvents were used in the process, approx. 20 gallons per year. wastes were placed in containers and disposed via municipal pick-up. Start-up date not reported in SI, but ceased operations in 1985. Site now a landscaped office park. The nearest wellhead is 100 ft north.

SI samples identified arsenic (40ppb) and nickel (10ppb) in shallow mw (25ft deep) background samples were nondetect. The MCL for arsenic in gw is 5ppb, nickel is 10ppb. Nickel could possibly be attributed to the site. Arsenic however is not suspected to be a waste product of the NAVTELL operations. The site is located approx. 1800 ft from the western boundary of the Ft. Lauderdale Executive Airport in a mixed commercial/industrial/residential land use area.

This site is judged to not be of NPL caliber. Further, using a conservative one year estimate of 20 gallons of liquid waste per year, the HRS waste qty would be zero. Therefore the site does not score above 28.50.
